When Your Kids Push Your Buttons

That certain look, attitude or behavior and your child “makes” you see red. Ever find yourself yelling those words you swore you never would? When children push our buttons, we revert to the “road rage” of parenting and react automatically and regretfully. In a split second, authority is lost, control is gone, and our children manipulate us by pushing those buttons again and again.

Find out where your buttons come from, why your children push them, and how to defuse them in order to effectively respond instead of react, regain authority, and become the parent your child has been asking for all along.

Bonnie Harris, MS Ed, Director of Connective Parenting, has been a child behavior and parenting specialist for twenty-five years. Based on her highly acclaimed books, *When Your Kids Push Your Buttons* (2003) and *Confident Parents, Remarkable Kids: 8 Principles for Raising Kids You'll Love to Live* (2008), Bonnie counsels parents, teaches parenting workshops, leads professional trainings and speaks internationally. The mother of two grown children, she lives in Peterborough, New Hampshire where she founded The Parent Guidance Center, now The River Center. To learn more, visit her website:
